Mineral & Chemicals Supplies

Mexxon Trading Division is part of a business network between Middle East Countries and mining units of South India.

We are well known around the world as one of the leading importer, exporter, trader, wholesaler cum supplier of Minerals, Silicon Carbide, Fused Alumina, Rutile, TiO₂, Zircon, mannite, Garnet Abrasive, Copper Slag, Barite and Bentonite. Mexxon has consistently met the requirements of its clients across different industries, ensuring they get the best quality in every traded item.

We owe our consistency to our good sourcing ability.

Our main trading product is the garnet abrasive. Our garnet abrasive is mined from the South Coast of India and processed with the most efficient technology to eliminate the dust and Chloride.

We also make use of standardized sieve to divide particles into the following sizes:

- ◆ 20-40 mesh used for blasting & Water filtration
- ◆ 30-60 mesh used as abrasive for blasting purpose
- ◆ 80 mesh used for water jet operations

120 mesh used for blasting on a glass surface.

We also mine Ilmenite which is the most important ore of titanium. Our ilmenite is mined from the South coast of India and is segregated from various other minerals using magnetic separation. It has rich content of TiO₂, varying between 48%- 56%. It is then loaded in loose inside the container and exported. Our Ilmenite provides a very high quality of titanium dioxide, which is used in paints, fabrics, plastics, paper, sunscreen, food and cosmetics. We ship significant volume of ilmenite to China and other parts of the world.

Contracting & Construction Services

Contracting is one of the most important parts of our business. We take a systematic approach to contracting, ensuring that our clients, people and supply chain work together, providing innovate ideas wherever possible to guarantee delivery.

We set the highest bar possible for both service quality and consistency throughout all areas of expertise. To ensure maximum satisfaction between our clients, we have put in place various management systems and support teams. We also make safety, quality and environmental protection are the main priorities of our every project. OIGC can take up in-house and on-site Sandblasting and Painting work for pipelines, equipment and all kinds of structural Works. We provide a diverse suite of services to address virtually any surface treatment and protection challenges.

We provide the perfect mix of local knowledge and world-class expertise to provide the very best result on projects including new Contracting, renovation, and maintenance of commercial buildings and properties.

By using this strategy, we have the ability to ensure a project remains on schedule while maintaining an affordable overall cost as we are able to collectively cover both management and Contracting altogether. Committed to safety, quality and customer service, our tradesmen are experts in new coating technologies, application processes, and safety procedures. From small jobs to large-scale contracts, we take pride in our workmanship and continually strive to surpass customer expectations. You can depend on us for the best!

Construction Services

Mexxon engineering services relative to building design, construction and maintenance have formed the core activity of our operations. We offer our clients direct access to a team of highly qualified and experienced specialists extending a variety of consultancy services in preliminary work, building design, construction management as well as construction supervision and maintenance. From different constructions' preliminary or structural designs, HVAC design, electrical and control systems to fire safety planning and designing diverse acoustical solutions, Mexxon specialists have the know-how and the keen knowledge to solve any project's difficulties regardless of its related challenges.

- ◆ Civil & mechanical
- ◆ Steel reinforcement & precast
- ◆ Electrical and instrumentation
- ◆ Fabrication & erection
- ◆ Dismantling & demolition

1 Civil & mechanical

All services are precisely and professionally executed utilizing the suitable resources and applying latest technologies. Moreover, to meet the diverse requirements of the clients, we frame and develop the solutions based on the demands and budgetary constraints of the clients. Our service spectrum comprises general civil and building works, HVAC & Firefighting, misc structural steel work, waterproofing, painting/coating works, temporary facility and site development works & other industrial construction services. We are one of the fast-growing organizations, engaged in rendering admirable Industrial Civil & Building Work. These are executed by expert professionals, who have vast years of experience and in-depth knowledge in this field.

2 Steel Reinforcement & Precast

Mexxon provides Total Steel reinforcing solutions to the construction and civil engineering industries, including the supply, cut, bend, delivery and fixing of reinforcing steel. Delivery of high tensile and mild steel reinforcing for all from Office blocks, Shopping Centers, Bridges and Dams to low-cost housing. The company enjoys a recognized industry track record of delivering highest quality products and service excellence.

Mexxon offers clients a complete steel reinforcing solution, which includes the additional on-site service of placing and wiring the reinforcing products in position. Mexxon is an independent reinforcement supplier and not affiliated/ associated to any civil or building company. Mexxon cut and bend the reinforced bars according to the bending schedules supplied by the customer. Mexxon can refer customers to qualified, practicing engineers to assist with the drawing-up of bending schedules.

Mexxon have years of experience and have completed many projects in the formwork and steel fixing industry. We set the highest standards in reinforced concrete construction and offer a broad range of skill and knowledge. Mexxon use both prefabricated formwork systems and made on site timber formwork to suit more bespoke projects.

Mexxon supply and fit reinforcement steel to various applications including:

- Raft Foundations
- Pad Foundations
- Ground Beams
- Concrete Columns
- Slatted Tanks
- Soilage Walls
- Retaining Walls
